

Screening brief

Fictional example for trying file upload and PDF preview.

Business criteria

Software for policy administration and claims management.

Customers include insurers, managing general agents, and TPAs.

Include

Core software products used in insurance operations.

Exclude

Broker marketplaces, generic CRM, and pure consulting.

Analyst review

Fictional example - page 2.

Confirm before searching

Review the core business definition and approve the criteria.

Keep company examples and supporting sources in the chat.

Reference details

Financial size, location, and ownership do not filter the search.

MID and ISCC relevance scores remain separate.

Next step

Review the company list, then choose enrichment or screening.
